EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

1. This communication is an Examiner's reasons for allowance in response to application filed on February 18, 2004, assigned serial 10/779,627 and titled "DATA TRANSMISSION SYSTEM AND OCCUPANT PROTECTIVE DEVICE".

- 2. The following is the Examiner's statement of reasons for the indication of allowable subject matter:
- a. After carefully reviewing the application in light of the prior art of record, the amended claims and additional search of all the possible areas relevant to the present application, a set of related prior art references has been found, but those prior art references are not deemed strong to make the application unpatentable. Thus, it is found that the application is now in condition for allowance.
- b. Although the prior art disclose several claimed limitations, none of the references teaches a data transmission system having a sending unit and a receiving unit which includes a signal generating means for generating a signal that varies within a predetermined range, a converting means for converting the signal to generate a digital value with a resolution of K bits, a compressing means for compressing the digital value to generate a digital of L bits, wherein L is smaller than K, and sending means for sending the compressed digital signal to the receiving unit, wherein when the digital value is outside the given range, the digital value of L bits is generated by dividing the digital value by a first divisor, wherein when the digital value is within the given range, the digital signal of L bits is generated by dividing the digital value by a second divisor, and wherein the first divisor is $2^{(K-L)}$, while the second divisor is less than $2^{(K-L)}$ (claims 1 and 7).
 - c. Claims 1-13 are allowable over the prior art of record.

Art Unit: 3661

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Tan Nguyen, whose telephone number is (571) 272-6966. The examiner can normally be reached on Monday-Thursday from 5:30 AM-4:00 PM

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Black, can be reached on (571) 272-6956.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks Washington, D.C. 20231

or faxed to the Central Fax: (571 273-8300.

NOTICE OF PUBLICATION OF APPLICATION

The above-identified application will be electronically published as a patent application publication pursuant to 37 CFR 1.211, et seq. The patent application publication number and publication date are set forth above.

The publication may be accessed through the USPTO's publically available Searchable Databases via the Internet at www.uspto.gov. The direct link to access the publication is currently http://www.uspto.gov/patft/.

The publication process established by the Office does not provide for mailing a copy of the publication to applicant. A copy of the publication may be obtained from the Office upon payment of the appropriate fee set forth in 37 CFR 1.19(a)(1). Orders for copies of patent application publications are handled by the USPTO's Office of Public Records. The Office of Public Records can be reached by telephone at (703) 308-9726 or (800) 972-6382, by facsimile at (703) 305-8759, by mail addressed to the United States Patent and Trademark Office, Office of Public Records, Alexandria, VA 22313-1450 or via the Internet.

In addition, information on the status of the application, including the mailing date of Office actions and the dates of receipt of correspondence filed in the Office, may also be accessed via the Internet through the Patent Electronic Business Center at www.uspto.gov using the public side of the Patent Application Information and Retrieval (PAIR) system. The direct link to access this status information is currently http://pair.uspto.gov/. Prior to publication, such status information is confidential and may only be obtained by applicant using the private side of PAIR.

Further assistance in electronically accessing the publication, or about PAIR, is available by calling the Patent Electronic Business Center at (703) 305-3028.
